

(Registration Number: UK06008122023012444)

HIMWAL (Himalayan Women, Awareness and Livelihood) Society, an Uttarakhand-based NGO founded under the Societies Registration Act 21, 1860, is dedicated to environmental conservation and the preservation of unique cultural heritage of Uttarakhand.

AIM AND OBJECTIVES OF THE NGO

By focusing on the outlined objectives, the HIMWAL SOCIETY aims to develop a comprehensive strategy to address and mitigate the various environmental challenges faced by the unique and sensitive ecosystems in Uttarakhand, a state in the northern part of India known for its rich biodiversity and natural resources, ensuring their health and resilience for generations to come:

- 1. BIODIVERSITY ASSESSMENT:** To enhance the conservation of endangered and vulnerable species in the high-altitude regions of Uttarakhand through community engagement, scientific research, and sustainable practices, ensuring the long-term preservation of biodiversity and ecosystems.

- 2. CLIMATE CHANGE IMPACT ANALYSIS:** To analyze the impacts of climate change on the region's ecosystems, with a particular focus on changes in water resources (especially traditional water

sources), the frequency of natural disasters, agriculture and the livelihoods of the Himalayan communities.

- 3. COMMUNITY ENGAGEMENT AND LIVELIHOOD GENERATION:** HIMWAL works to strengthen rural livelihoods in high-altitude regions by promoting the sustainable use of locally available natural resources. The organization provides training on advanced scientific and technological interventions to enable the development of value-added products, thereby enhancing income opportunities for farmers, particularly women. At the same time, HIMWAL actively engages with local communities to understand their dependence on natural ecosystems, involve them in conservation initiatives, and encourage the adoption of sustainable practices that help reduce environmental risks and ensure long-term ecological balance.

- 4. EDUCATIONAL OUTREACH:** Raise awareness about the importance of the Himalayan ecosystems and the threats they face through educational programs, workshops, and public campaigns.

Geographic Reach: Our research area span rural areas and urban centers across Uttarakhand. We work locally to implement our programs and initiatives, ensuring a broad and diverse impact.

CURRENT ACTIVITIES OF THE SOCIETY

Since our establishment, we have launched the following programs:

- 1. Millet Nutrition Program:** We have named this program “**Bhojan Vikas Karyakram**” (भोजन विकास कार्यक्रम). Through this program, we aim to educate rural women about the nutritional values and benefits of consuming various traditional crops such as millets and pulses that they cultivate. So far, we have selected villages in the Joshimath block and conducted meetings and also a workshop in this topic.
- 2. Traditional Seeds Collection and Preservation:** This program is named “**Beej Sanrakshshan Karyakram**” (बीज संरक्षण कार्यक्रम): We are collecting traditional seeds from various villages situated at different altitudes in Uttarakhand to conserve and preserve these valuable resources. These seeds will be distributed to the progressive farmers to ensure their sustainability.
- 3. Environment Awareness Program “Paryavaran Jagrukta Karyakram”** (पर्यावरण जागरूकता कार्यक्रम): HIMWAL Society has organized numerous environmental programs and online webinar with school and college students to raise awareness about various environmental issues. Experts from different fields have delivered lectures and shared their experiences with the students. School students have participated in various activities such as painting, quiz, and essay writing. These programs include Celebration of National wildlife Week, World Wetlands Day, National Science Day, World Water Day, World Forestry Day, and Earth Day etc.
